SLEEK.

SUSTAINABLE.

STRONG.

WE MAKE THREAD THAT HELPS MAKE WHATEVER YOU MAKE BETTER.

At A&E, we innovate so that your footwear can be everything it was designed to be. Whether you demand finely contoured seams, sustainability, strength, or all three, we understand that performance is the common thread in everything you create. And performance just happens to be what we do. *Visit amefird.com to find your perfect thread.*

A&E
Innovate. Create. Deliver.

LEATHER. LACE. CONTRACT MANUFACTURING.
ENGINEERED FOR FUNCTION.

**AUBURN
LEATHER**™

CELEBRATING LEATHER CRAFTSMANSHIP SINCE 1863

Creating the new counter culture

For boxtoes, counters & upper reinforcements

We make counters that make a difference.

We're proud to introduce our latest generation of low carbon cost, light weight, high performance counter materials. Available in sheet form, or pellets for injection moulding, our range of counters use up to 80% reprocessed materials – diverting 'landfill' to a second life.

We make for improved performance, we make more sustainable products and we make competitively priced, materially different shoe counters that contribute to a superior shoe shape.

And that's what makes us Materially Different.

503-421-7559

3M™Thinsulate™Insulation: The unique blend of microfibers and fine fibers work by trapping air molecules between you and the outside. The more air a material traps in a given space, the better it insulates you from the cold outside air.

3M™Thinsulate™Insulation is thin, light, warm, and effective when wet with our hydrophobic fibers.

3M™Scotchlite™ReflectiveMaterial: Everyone Needs to Be Seen- Enhanced Visibility for Runners, Cyclists and Fashionistas Everywhere

Scotchgard™Protector—**NEW:Scotchgard™ProtectorFC-FREE** DWR. 80-20 certified, Excellent durability and breathability, Bluesign Approved. Plus- Industry leading technology featuring C4 chemistry for a wide variety of DWR, Stain and Oil repellency solutions.

Auburn Leather Company is the leading U.S. manufacturer of Genuine Rawhide Leather Laces for the footwear market. As we celebrate over 150 years of leather craftsmanship, we continue to achieve consistently superior leather laces by controlling our entire supply chain - from raw material selection, tanning, coloring, cutting, and testing. We offer specially-designed, aniline drum-dyed lace options made from U.S domestic cowhide for boat/deck shoes, boots, slippers, as well as specialty and decorative uses, all of which are "Engineered for Function." We are also proud to introduce new repurposed and finished leathers for small leather goods, footwear trim/accents.

steel@bushin.co.kr

Booth: 815, 817

KR

82-51-831-6556

Bushin Textile has grown into a world-class textile company. We have established a firm foundation in Vietnam, Indonesia and

China due to lots of experiences and expertise on footwear industry.

One of our specialties is 'COLOR MIGRATION SOLUTION NAMED MIGRATION FREE' such as good dyeing quality on canvas materials and because of that, we've been gaining reputation from buyers. Plus, compared to our counterparts, delivery is faster and we make every effort to develop brand new materials to satisfy buyers and ultimately for individual consumers. For example, we released cutting-edge innovative textiles named NODIRT-TEX (easily washed with a soap in water), NODOR-TEX (preventing textile from bad smell, especially useful for sockliner cover), COOLTEX (lowering temperature of textile up to 2.4°C)

We hope you use our materials on footwear, apparel and so forth. We look forward to getting in touch with you in the coming future. Thank you very much.

ENR - the manufacturer of the composition leather

The RECYCLED LEATHER: Clean technology for environment by reusing shaving scrap leather.

The alternative to traditional leather.

ENR is composition leather outperforms traditional leather in several keys

- Better cost efficient: It is cut from a roll not from a hide, the cutting yield will be higher, less wastage and reduced cost.
- Product consistency: Since there is no natural defects, better for product consistency.
- Environment friendly: ENR is composition leather patented process minimize the chemical uses.

As one of the materials used for the upper leather of a shoe, rubber serves as an alternative to natural leather. Rather than the upper leather, rubber has been conventionally used as a material requiring high flexibility such as an outsole. This is a product that utilizes merits of rubber as the upper leather. Our products are divided into rubber-only type such as TANK and a rubber-coated reinforcement material (non-woven fabric, etc.)

Use our RP to make your synthetics!

Favini is the world leader in the design and creation of patterns and designs for the production of synthetic leather. With over 250 embosses in our existing portfolio, we offer a range of technical effects and novelty designs as well as traditional leather grains.

Our release paper is manufactured in Italy but sold globally to leading synthetic suppliers. Whether you manufacture in Asia, USA or Europe we will be able to use our existing relationships to send our paper to the converters in the manufacturing market of your choice.

With release papers suitable for PU, water-based PU and PU/PVC applications, we have the products to meet your needs.

When you are next surfing the net, take a few minutes to browse the Casting Release section of our website: www.favini.com/release

Drop by our booth, **106** at the NW Materials Show to view our full design portfolio and to discuss your footwear material requirements.

508-384-0366

OrthoLite comfort insole foam is an open cell PU foam used in footbeds, linings and other non-footwear applications. OrthoLite is a unique foam that combines the strength of virgin liquid PU with the breathability and moisture transport of open cell PU. In addition, OrthoLite has an anti-microbial that fights fungus, bacteria and odor. There is no other foam available that combines these properties to create a perfect comfort environment inside the shoe.

OrthoLite products can also be customized in multiple ways to create a unique performance story for each customer. In addition, there are now many OrthoLite formulations to choose from such as EcoOrthoLite, slow recovery Lazy OrthoLite, high rebound X40 OrthoLite, ESD OrthoLite, and more!!

OutDry Technologies

Elizabeth Simon
esimon@outdry.com

Booth: 424

US
206-225-6242

Absolutely waterproof. Highly breathable. Guaranteed.

OutDry® uses a one-piece patented construction process that creates a waterproof breathable barrier.

This impenetrable layer is heat-bonded directly to the outer fabric, leaving no seams, no gaps, and no way for water to get in. Compare that to traditional waterproof technology. Water gets in and stays in, collecting in the space between the inner and outer layers, making them heavy and wet. OutDry improves fit and dexterity, keeping you drier, lighter and more comfortable.

Outlast Technologies LLC

Tong Hong Tannery, one of the world's premier Split Suede and PU Leather suppliers, produces a combined capacity of 18 million sf per month. With facilities located in Southern China, Vietnam and Indonesia, our manufacturing footprint provides an excellent supply chain for most world class athletic, outdoor and casual footwear brands. All three of our production facilities are LWG Gold certified.

Tong Hong is strongly committed to the environment with state of the art waste water treatment facilities and PU leather lines. Additionally, we have developed and commercialized a water based pu coating system, Hydro PU, that eliminates solvents. With Tong Hong's large customer base and high volumes, we have the ability to price aggressively with a number of different leathers. Some of these provide a good replacement for full grain leathers. Tong Hong employs full time employees, rather than agents, to work with USA customers to ensure excellent service and communication.

We encourage you to stop by our booth to experience our friendly service and diverse leather selection.

Toray International America Inc. is part of the Toray Group, a \$16 billion corporation with operations at over 220 locations around the world. Although the Toray Group serves virtually every major industry, the company's core expertise is rooted in three fields of chemistry: organic synthetic, polymer and biochemistry. Today, the Toray Group's foundation businesses—fibers textiles and plastics & chemicals—contribute to industries as diverse as fashion and housing, IT and pharmaceuticals.

The inventor of the technological breakthrough that made ultra-microfiber materials possible, Toray remains the worldwide leader in these advanced materials, researching, developing and marketing them through our global Microfiber Division, founded in 2001. The Ultrasuede Department of Toray International America Inc. takes charge of all sales and marketing activities in the Americas.

Everywhere we market our unique products, we are committed to meeting the needs of our customers with synergistic solutions to our customers' most challenging demands. In addition to comprehensive marketing support services, we also offer full-range R&D support through our R&D facilities and Technology Center in Japan.

GRUPO Skytex

Skytex Mexico is a vertical textile mill specializing in NAFTA knits and woven fabrics for the apparel trade. Family founded, owned and operated since 1995, Skytex has grown into one of the largest and advanced textile manufacturers in North America. Our mission is to be recognized by our customers as a global leader and innovator of textiles—dedicated to continuously improving the products and services we provide.

Skytex's woven department specializes in polyester fabrics manufactured on the latest air jet and water jet looms and technologies. Our knit department focuses on polyester, nylon, acetate, rayon and spandex blended fabrics.

Skytex computerized circular single knit, double knit, jacquard and seamless machines allow us to produce a large variety of stitches and gauges. Our finishes include: dyeing, rotary & digital printing as well as the ability to apply special performance finishes. Skytex also manufactures 118" woven jacquards, felt, ribbon, knitted mattress ticking, area rugs, tricot, lace and finish product both for apparel, home and industry.

Skytex has achieved success because of our dedication to quality. A highly trained staff of technicians, chemists and textile engineers track every order from the first yarn spool to the finished product ensuring our customer receives the standard of product on which Skytex's reputation was built. Furthermore, the Skylab was recently certified by Bureau Veritas (B.V.) which demonstrates our labs excellence and drive for continuous improvement through B.V. rigorous training requirements and industry leading standards.

Skytex is recognized and considers themselves a green company, always looking to decrease our impact on the environment. The cornerstone of our sustainability initiative is minimizing our textile waste with our recycling systems. We recycle all of our wastewater with Skytex's state-of-the-art reverse osmosis water treatment plant. In addition, we recycle all of our fabric waste and manufacture it into an industrial product. Most recently, Skytex has become energy independent with the completion of our sustainable power plant that allows us to make 100 percent of our electricity using clean and natural energy. Our commitment to sustainability has given us a competitive edge not only by increasing our efficiency but also by gaining the confidence of our customers, consumers and local community.
